INSTRUCTIONS

Manage your pace, control your fatigue, and time your surges wisely in this tactical 10,000 m track race. Push too hard too soon and you may hit the wall. Save just enough energy for a powerful final lap.

FINAL LAP

The 10,000 m Track Race

COMPONENTS

Five six-sided dice, a pen, and the scoresheet on next page.

HOW TO PLAY

The race is run over eight rounds, each representing a stage of the 10,000 m race.

1. Choose a Pace

- Choose one of the four pacing options.
- Write your chosen pace in the *upper-left* space of the round circle.

2. Roll Dice

- Roll dice according to the rules for the pace you selected.
- If you like, you can write your round result in the *upper-right* space of the circle.
- Add your round result from the previous score and write your running total in the *lower-left space.*

3. Check for Fatigue

- Apply any fatigue gained from your dice roll.
- Add to your existing fatigue by writing the total in *the lower-right space.*

SCORING

Option 1

After eight rounds, the player with the highest total score wins the race.

Option 2

Each point scored represents one second gained against a baseline race time.

- Final time = 1680 – Total Score.

1680 seconds equals 28 minutes, which represents a strong elite-level 10,000 m performance.

World Record Challenge

If your final time is 1571 seconds (26:11) or faster, you have beaten the current men´s 10,000 m world record set by Ugandan runner Joshua Cheptegei on October 7, 2020, at Estadi del Turia in Valencia.

Game length: 5 minutes per player. – Take turns in a multiplayer game

PACE OPTIONS

1. Easy Pace

- Roll 3 dice.
- Your highest die is your round result.
- Remove 1 fatigue point if you have any.
- If you have 9 or more fatigue points, your only option is this pace.

2. Steady Pace

- Roll 4 dice.
- Your two highest dice are your round result.
- Each die showing 1 adds one fatigue point.

3. Surge

- Roll 5 dice.
- Your three highest dice are your round result.
- Each die showing 1 or 2 adds 1 fatigue point.
- On a third consecutive surge, a die showing 1,2, 3, or 4 adds one fatigue point.
- You cannot surge four times in a row.

4. Final Kick

- The final kick may only be declared in Round 8
- You cannot declare a final kick if you have 9 or more fatigue points.
- Roll five dice and score the highest 3 dice + 5 bonus points.
- If two or more dice show 1, you collapse and record a DNF (Did Not Finish)
- You do not need to track fatigue points since the race has ended.

FATIGUE SYSTEM

0-5 - Normal Play

6-8 - Tired. Only roll one fewer die per roll.

(For example, if you choose Steady Pace, you can only roll 3 dice instead of 4.)

9+ - Hit the wall. Only easy pace is allowed.

FINAL LAP

The 10,000 m Track Race

	Runner 1	Runner 2	Runner 3	Runner 4
Round 1 Laps 1-5 Starting Block – Settle in				
Round 2 Laps 6-9 Early Race – Steady energy				
Round 3 Laps 10-12 Find the pack – Gauge position				
Round 4 Laps 13-15 Middle Stretch – Push slightly				
Round 5 Laps 16-18 Settling-in – Fatigue builds				
Round 6 Laps 19-21 Tiring laps – Decide risk vs reward				
Round 7 Laps 22-24 Positioning for finish – Calculated risks				
Round 8 Lap 25 Final kick – Empty the tank!				
Final score, best time, or finish place →				

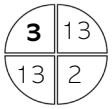
FINAL LAP - PLAYTHROUGH EXAMPLE FOR 1 PLAYER

ROUND 1

I choose "**3**. Surge" and log my choice in the upper-left section of the circle. (in the scoresheet)

Let's say I roll five 5,4,4,2,1.

- My score for the round is 13.
- My accumulated distance score is 13.
- My accumulated fatigue is 2

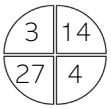


ROUND 2

I choose "3. Surge" again and log my choice.

Let's say this time I roll 6,5,3,2,1.

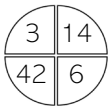
- My score for the round is 14. (6+5+3)
- My accumulated distance is 27. (13+14)
- My round fatigue is 2 and total fatigue is 4.



ROUND 3

I decide to be super aggressive and choose "Surge" once again. Because this is my third consecutive "Surge" the penalty is higher. Now, each 1, 2, 3, 4 will incur fatigue points. Let's say that I roll 5, 5, 5, 4, 1.

- My round score is 15 and accumulated distance is 42.
- My round fatigue is 2 and my total fatigue is 6.



ROUND 4

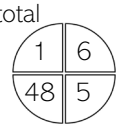
My only choices are Easy Pace and Steady Pace, as I cannot Surge four times in a row. Let's say I choose Easy Pace.

Normally I would roll three dice according to Easy Pace rules, choosing the highest die as my total score, and removing one fatigue point from my fatigue score.

However, because my current fatigue is between 6-8 (I am tired!), I must roll one less die. Thus, I roll 2 dice instead of 3. I still pick the highest die as my total round score and remove one fatigue point from my fatigue score. (Easy pace allows me to recover!).

Let's say I roll 6,1. My round score is 6 and my total distance is 48.

I remove 1 fatigue point from my score.

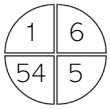


ROUND 5

I choose Steady Pace. Since I am below 6 fatigue, I can roll the normal number of dice according to the Steady Pace rules. Let's stay I roll 3, 3, 2, 2

My total score for the round is 6, and accumulated distance is 54.

My round fatigue score is 0 since I did not roll any 1s, so my total fatigue score is still 5.

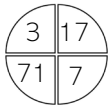


ROUND 6

I choose "Surge" and roll a 6, 6, 5, 2, 2

My total score for the round is 17 and accumulated distance is 71.

My round fatigue score is 2, and total fatigue is 7.



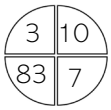
ROUND 7

Here a Surge would be quite risky because if I incur two fatigue points, it will put me at 9 fatigue points total, preventing me from choosing the Final Kick option next round.

Therefore, I will choose Steady Pace, the less risky option. That could still land me two fatigue points if I get two 1s, but I decide to take the lower risk.

Alternatively, I could choose Easy Option and avoid any risk whatsoever, but my round score will be lower as only the highest die counts as my total round score.

Let's say I roll a 6, 6, and 3 (My fatigue is between 6-8, therefore can only roll 3 dice instead of 4). My round score is 12 and accumulated distance is 83. My fatigue is 0, and accumulated fatigue is still 7.



ROUND 8

I opt for the final kick! A player normally rolls five dice for Final Kick. However, since I have more than five fatigue points, I can only roll four.

Let's say I roll 6, 5, 3, 1. My round score is 14 + 5 bonus points. Therefore, my round score is 19 and my final distance is **102**. (Notice if I had rolled two 1s I would have collapsed according to Final Kick rules and lose the game!)

SCORING

- 1680 seconds – 102 (your final score) = **1578**.
- You divide 1578/60 = 26.3
- 26 is your minutes and 0.3 x 60 is your seconds. Therefore, your running time was 26 minutes and 18 seconds.
- You need a score of 109 or higher to beat the world record holder in the 10,000 m track race! (See Scoring Rules)
